WORK EXPERIENCE

Digilamb Technologies — Software Development Intern [August 2025 – January 2026]

- Built backend REST APIs using FastAPI, handling request/response flows in modular Python services
- Worked with PostgreSQL, writing basic SQL queries and integrating relational data through APIs
- Explored backend deployment and AI integration fundamentals, focusing on how APIs are structured and connected within scalable application workflows

Full Stack Web Development Bootcamp — Python & Django (Certification, 2025)

- Completed an intensive full-stack bootcamp with hands-on training in Python, Django, HTML, CSS, Bootstrap, JavaScript, and jQuery
- Built multiple full-stack projects implementing authentication, REST APIs, and relational database modeling, gaining practical exposure to end-to-end development workflows

PERSONAL PROJECTS

Real-Time Activity Monitoring Platform | Django | Channels (WebSockets) | [Link](#)

- Built real-time dashboards using Django REST Framework and Django Channels for live data streaming
- Implemented token-based authentication for REST APIs and WebSocket connections
- Reduced update latency by ~40% by integrating REST endpoints with WebSocket streams

IntelliView — Full-Stack Django Application | Django | DRF | AI Integration [[Link](#)]

- Developed a full-stack Django application using Django REST Framework, architected to support AI-driven interview question generation and feedback workflows
- Designed PostgreSQL schemas and modular backend services for scalable API interactions
- Optimized backend logic and database queries, achieving ~30% performance improvement during simulated load and stress testing

EDUCATION

Savitribai Phule Pune University || Maharashtra

Pune, India

Bachelor of Computer Applications (BCA)

August 2022 – June 2025

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Artificial Intelligence, Software Engineering, User Experience/User Interfaces, Object-Oriented Programming, Web App Development

ADDITIONAL

Technical Skills:

- Python, C++, SQL • Django, FastAPI • PostgreSQL • React.js, Express.js • Git
- REST APIs • Full-Stack Web Development • Web Application Development • API Testing

Problem Solving & Practice:

- Active problem-solving on LeetCode, focusing on data structures, algorithms
- Hands-on SQL practice on HackerRank, working with joins, subqueries, and relational queries
